

Deep Bowl Schedule

This is the schedule that I use for 96 glass on an 8" to 12" bowl with a 2 1/2" to 3" fall.

The theory is that the slower the schedule the more likely it is to fall evenly.

| Segment | DPH | Temp | Hold |
|---------|------|------|-------|
| 1 | 300 | 1200 | 30 |
| 2 | 300 | 1250 | 40-55 |
| 3 | AFAP | 950 | 45-60 |
| 4 | 200 | 800 | 0 |
